## MODEL FL5000A FL5000A/01-/02

NOTE: Models FL5000A, FL5000A/01-/02 differ in respect of record changer type only. Refer to "Specifications."

### SPECIFICATIONS

(Subject to alteration without notice)

Power Supply	.....	200-250V, 40-50 c/s.
Tuning Range	.....	530-1620 kc/s. 4.7-9.2 Mc/s. 9.1-18.4 Mc/s.
Intermediate Frequency	.....	455 kc/s.
Cabinet	.....	Radiogram
Record Changer	FL5000A	Philips type AG1003
"	FL5000A/01	" " NG1011
"	FL5000A/02	" " AG1014

### VALVE EQUIPMENT AND VOLTAGE ANALYSIS

Valve Function	Valve No.	Valve Type	Plate Volts	Screen Volts	Osc. P. Volts	Cathode Volts
Frequency Converter	V1	6AN7	240	55	68	—
I.F. Amplifier	V2	6BH5	240	55	—	—
Demodulator, A.V.C. and 1st Audio	V3	6BD7	75	—	—	—
Phase Splitter	V4	6BD7	128	—	—	23
Push-Pull Power Amplifier	V5	6M5	280	240	—	7.6
Push-Pull Power Amplifier	V6	6M5	280	240	—	7.6
Rectifier	V7	6V4	Cathode — L18 C.T., 285V.			
Dial Lamps (2), Bezel Lamp	V11, 12, 13	6.3V, 0.32A tubular screw				
Voltage across R26, -2.1V.						

NOTE: These voltages are measured with an "1,000 ohms per volt" meter and may vary  $\pm 10\%$  from the figures quoted. They are measured from the socket points indicated to chassis or across the resistors listed. The receiver should be in a "no signal" condition.

#### TO REMOVE CHASSIS FROM CABINET.

Remove the power plug from the mains outlet socket. Remove the four control knobs (a firm pull is all that is necessary). Remove the cabinet back. Remove the aerial and earth terminal panel and unclip the leads from the cabinet.

Remove the pick-up, speaker, grammo. unit power and bezel lamp plugs from their respective sockets. Remove the two screws at the top of the dial back plate and the two screws at the rear of the chassis. The chassis may now be withdrawn from the cabinet.

The replacement of the chassis is a reversal of the above procedure. Care should be taken to see that the front edge of the side chassis flange engages under the lip of the front mounting bracket.

#### MAINS VOLTAGE ADJUSTMENT.

The power transformer is provided with two mains voltage tappings on the primary winding—200/230 volts and 240/250 volts—for adjustment to the supply voltage at the point of installation. The receiver is adjusted at the factory to the 240/250 volts tapping.

#### DIAL CALIBRATION.

In the event of an equal calibration error over the entire dial scale, the dial cursor can easily be moved on the dial drive cord to correct the error.

#### ALIGNMENT.

During alignment, set volume control at maximum and tone control at central position. With the tuning capacitor fully closed, set the dial cursor on the 120 mark of the relocation scale.

I.F. channel alignment is carried out in the following sequence:—

- Screw out iron core of 2nd I.F.T. primary (nearer 6BH5) as far as possible. Adjust iron cores for maximum output in the following sequence—
- Peak secondary of 2nd I.F.T. (nearer 6BD7).
- Peak secondary of 1st I.F.T. (nearer 6BH5).
- Peak primary of 1st I.F.T. (nearer 6AN7).
- Peak primary of 2nd I.F.T. (nearer 6BH5).

Do not repeat any adjustments.

The trimmer layout drawing is shown as an inset on the circuit diagram drawing.

B/c band alignment frequencies are: 1,420 kc/s, 3XY (oscillator and aerial trimmers), and 600 kc/s, 7ZL (slug padding with gang rocking).

On the short wave bands the oscillator operates on a frequency above signal frequency so that of the two signals tunable on the receiver, the high frequency one is correct. In short wave alignment, SW2 band (4.7-9.2 Mc/s) should be done first before attempting alignment of SW1 band.

On SW2 band (4.7-9.2 Mc/s) alignment frequencies are: 4.825 Mc/s (114 on relocation scale), (oscillator coil slug) and 8.9 Mc/s (16 on relocation scale), (oscillator and aerial trimmers). Rock the tuning gang while adjusting the aerial trimmer.

SW1 band (9.1-18.4 Mc/s) alignment frequency is 17.8 Mc/s (small green triangle), (oscillator and aerial trimmers, rock gang while adjusting aerial trimmer). Calibration should be checked at 9.65 Mc/s (small green triangle).

Do not attempt to adjust the iron cores of the aerial coils.
